

AtomEco

International Forum-Dialogue and Exhibition “AtomEco 2017”

November 21-22
Moscow, World Trade Center

AtomEco Forum is an international platform for discussion of nuclear power industry environmental aspects. Traditionally Forum participants are the leading Russian and international companies specializing in radioactive waste and spent nuclear fuel management, decommissioning of nuclear and radiation hazardous facilities, treatment of different environments, industrial waste reprocessing. The Forum will combine specialized exhibition, conference, B2B meetings, negotiations, contracts signing.

Subway station: Ulitsa 1905 goda, Vystavochnaya, Krasnopresnenskaya

WTC is one of Russia's largest multifunctional centers, located in the very center of Moscow.

Why participate?

- To demonstrate your products and services for target audience;
- To attract new customers and partners;
- To have negotiations with key business partners;
- To improve company awareness among the major players in nuclear industry;
- To assess the status and needs of the market.

Forum main topics

- Advanced technologies and exchange of the best practices in radioactive waste and spent nuclear fuel management, decommissioning of nuclear and radioactive hazardous facilities.
- International cooperation in the area of NPP decommissioning.
- Experience and perspectives in optimization of solutions for decommissioning and territory rehabilitation.
- Development of system for radioactive waste management.
- Creation of final isolations of radioactive waste.
- Spent nuclear fuel reprocessing as a choice for safety strategy.
- Environmental safety and public acceptance of nuclear power.
- Roll-up of the first stage of the Federal Target program (FTP) Nuclear & Radiation Safety-2 (NRS-2) and tasks ahead.
- Open tenders participation opportunities in the framework of FTP NRS-2.
- Interaction of state customers with enterprises, organizations, institutions in the area of products purchasing and supply in the framework of FTP NRS-2.
- International experience in the area of interaction with interested parties in nuclear power industry at different stages of national nuclear programs development.

Traditionally, within the framework of the International Exhibition and Conference "AtomEco", a Technical Tour with a visit of nuclear facilities is held.

2011 – visit to the Moscow LRW processing station at FSUE A.A.Bochvara VNIINM

2013 – visit to NPK FSUE RADON, facility with many years of expertise in radioactive waste management and providing for radioactive safety of the city of Moscow and the Moscow Region.

2015 – visit to the Obninsk nuclear power plant, the world's first nuclear power plant.

Sponsorship provides a unique opportunity to address the target group - industry experts from different countries. Participation in the event as a Sponsor will help promote your company's interests in the market of the industry, favor its image, strengthen your business contacts with the permanent target audience and gain the chance to bring in new customers.
